Summary

2024 CS graduate and software engineer with 2+ years of production experience building cloud-native web applications and REST APIs in **.NET/C#** and **Python**. Comfortable shipping full apps end-to-end using **AI coding tools** (GitHub Copilot, Claude Code) to accelerate development. Strong grasp of **MVC architecture**, database design, API development, and cloud deployments – able to demo and explain real, working systems live.

Skills

Languages: C#, Python, Java, TypeScript (familiar)
Web & APIs: .NET 8, ASP.NET Core (MVC), REST APIs, Node.js (familiar), Swagger/OpenAPI, API Versioning
Frontend: React (familiar), HTML/CSS, TypeScript
AI Dev Tools: GitHub Copilot, Claude Code, Cursor
Cloud & DevOps: Azure DevOps, GitHub Actions, AWS (S3, Lambda, SQS, EKS), Docker, Kubernetes, Terraform
Databases: MongoDB, PostgreSQL, MySQL, Redis, Query Optimisation
Architecture: MVC, Microservices, CQRS, Event-Driven, OAuth 2.0, JWT

Experience

Verisk Analytics Jan 2024 – Present
Software Engineer II, Hyderabad, India

- Built and shipped **ASP.NET Core MVC (.NET 8)** REST APIs handling **200K+ weekly requests** with input validation, structured error handling, and **Swagger/OpenAPI** docs – demoed and owned end-to-end.
- Co-designed **RulesRunner**, a cloud-native **C# microservice** using **CQRS** and async **SQS** queuing, cutting client-side latency by **83%** (3000ms → 500ms) with horizontal scaling on **AWS**.
- Built large-scale async data pipeline handling **30+ data types** via **S3**, **MongoDB**, and signed URL flows, reducing transfer time **38%** – shipped with full ownership from design to production.
- Implemented **OAuth 2.0 / JWT** auth with **Okta** on **Kong API Gateway**; applied API versioning for backward-compatible, multi-client deployments.
- Improved hot-path API response time **34%** via **Redis** caching and **PostgreSQL / MongoDB** query optimisation; authored idempotent **C# migration scripts** for zero-downtime deploys.
- Overhauled **Azure DevOps** and **GitHub Actions** CI/CD pipelines with parallel jobs and automated tests, cutting deployment time **50%** and build cycles **33%**.
- Leveraged **GitHub Copilot** and **AI coding agents** throughout development to accelerate scaffolding, code review, and test generation – shipped production features faster with consistent quality.
- Instrumented cloud services with **OpenTelemetry** and **Splunk**; deployed on **AWS EKS/ECS** using **Docker** and **Kubernetes** with rolling, zero-downtime releases.
- Migrated legacy services to **.NET 8** with modern async/await patterns, cutting technical debt by **55%** and improving runtime throughput by **30%**.
- Wrote unit and integration tests using **xUnit/NUnit**; conducted structured code reviews covering architecture, edge cases, and production readiness across the team.

Projects

Expense Tracker – Full-Stack Microservices App Aug 2023 – Dec 2023

- Built and demoed a full cloud-native app with **5+ Java/Spring Boot microservices**, async **Kafka** messaging, **Kong API Gateway**, **Docker**, and **Kubernetes** – end-to-end from DB schema to deployed API.
- Designed **PostgreSQL** schema, MVC-style REST endpoints, and Kafka consumer group coordination; used **GitHub Copilot** throughout to accelerate development.
- Load-tested at **1000+ concurrent transactions** to validate production readiness; all services containerised and deployable from a single **Docker Compose** configuration.

Certifications

AWS Certified Cloud Practitioner Amazon Web Services — Oct 2024

Education

B.Tech in Computer Engineering – Vishwakarma Institute of Technology, Pune 2024 — CGPA: 8.8
