Sanskar Jain

Hyderabad, Telangana, India
9021620156 — sanskarjain0901@gmail.com — LinkedIn

Summary

Full-stack software engineer with 2+ years of experience building scalable microservices, REST APIs, and distributed systems. Proficient in **Java**, **Spring Boot**, and **React**, with strong SQL skills and hands-on cloud experience on **AWS**. Delivers customer-focused, high-reliability systems with measurable impact and a strong sense of ownership in cross-functional Agile teams.

Skills

Languages: Java, Python, C#
Backend: Java Spring Boot, REST APIs, Microservices, Kafka, Redis, CQRS, API Versioning, JUnit, Mockito
Frontend: React, HTML/CSS
Cloud & DevOps: AWS (S3, SNS, SQS, EKS, Lambda, ElastiCache), Docker, Kubernetes, Terraform, CI/CD
Databases: PostgreSQL, MySQL, MongoDB, SQL Query Optimization, Indexing
Tools: OAuth 2.0, JWT, Okta, Kong Gateway, OpenTelemetry, Splunk, Swagger/OpenAPI, Jira

Experience

Verisk Analytics Jan 2024 – Present
Software Engineer II, Hyderabad, India

- Co-designed **RulesRunner**, a stateless **Java Spring Boot** microservice using **CQRS** and **AWS SQS** that offloaded compliance checks from the client, reducing wait time from **3000ms to 500ms (83%)** and enabling horizontal scaling under peak load.
- Developed high-throughput **Spring Boot REST APIs** handling **200K+ weekly requests**; applied structured exception handling, bean validation, URL-based API versioning for backward compatibility, and **Swagger/OpenAPI** contract documentation.
- Architected event-driven microservices with idempotent processing, retry/backoff strategies, and **AWS Lambda** consumers ensuring zero message loss; authored technical design docs defining service boundaries, DLQ patterns, and **SNS** fan-out for distributed consumers.
- Engineered scalable **import/export service** for **30+ data types** in Java using async task execution, **S3 presigned URLs**, and **MongoDB**, reducing transfer time by **38%** and customer-reported issues by **25%**.
- Boosted API throughput by **34%** by integrating **Redis/ElastiCache** as a distributed cache layer and optimised **PostgreSQL** queries through indexing analysis, slow-query profiling, and execution plan tuning on hot-path endpoints.
- Wrote complex **SQL queries** for reporting and data analysis pipelines, including joins across normalised schemas, window functions, and aggregations to support business intelligence requirements.
- Established **OAuth 2.0** authentication on **AWS EKS** behind **Kong Gateway**, integrating **Okta JWT** tokens with Identity Server for secure cross-service authorisation across microservice boundaries.
- Slashed deployment time by **50%** and build cycles by **33%** by overhauling **CI/CD** pipelines with staged gates, parallel jobs, and automated testing; wrote **JUnit/Mockito** unit and integration tests maintaining high coverage.
- Instrumented services with **OpenTelemetry** distributed tracing and **Splunk** dashboards, reducing mean time to diagnose production incidents and improving overall system observability.

Projects

Expense Tracker – Full-Stack Microservices Application Aug 2023 – Dec 2023

- Built a full-stack expense tracker with a **React** frontend and **Java Spring Boot** backend split into **5+ microservices**, using async **Kafka** messaging and **Kong API Gateway** for routing, auth, and load balancing.
- Designed **PostgreSQL** schemas with optimised SQL queries; containerised services with **Docker** and orchestrated via **Kubernetes**; simulated **1000+ transactions** end-to-end for load and reliability testing.

Certifications

AWS Certified Cloud Practitioner Amazon Web Services — Oct 2024

Education

B.Tech in Computer Engineering – Vishwakarma Institute of Technology, Pune 2024 — CGPA: 8.8
