Sanskar Jain

Software Engineer | C#, Java | Modern Services, Scalable Web Applications
Hyderabad, Telangana, India | 9021620156 | sanskarjain0901@gmail.com | LinkedIn

Summary

Software Engineer with 2+ years of experience building and deploying scalable, production-grade services and web applications using C#, Java, and modern cloud-native technologies. Proven track record of shipping high-quality microservices at global scale, collaborating closely with Product, Test, and DevOps teams in Agile/Scrum environments. Passionate about learning new technologies and pushing beyond traditional solutions.

Key Skills

Languages: C#, Java, Python, TypeScript
Frameworks & Web: .NET 8, ASP.NET Core, Spring Boot, REST APIs, GraphQL, React (familiar), Angular (familiar)
Cloud & DevOps: AWS (S3, SNS, SQS, Lambda, ECS), Docker, Kubernetes, CI/CD, Terraform
Databases & Messaging: MongoDB, PostgreSQL, MySQL, Redis, Kafka
Tools & Practices: Azure DevOps, Swagger, Splunk, Postman, Git, Jira, Agile/Scrum

Experience

Verisk Analytics Jan 2024 – Present
Software Engineer II Hyderabad, India

- Built **RulesRunner**, a server-side microservice using **C#** and SQS that offloaded compliance checks from the client, reducing wait time from **3000ms to 500ms (83%)** and enabling flexible scaling across workflows.
- Deployed **ASP.NET Core** REST APIs serving **200K+ weekly requests** with structured error handling, input validation, and **Swagger**-documented contracts, ensuring quality and API stability at scale.
- Reduced data transfer time by **38%** and user-reported issues by **25%** by engineering a scalable backend for import/export of **30+** data types using async processing, AWS S3, and MongoDB.
- Cut technical debt by **55%** and improved runtime performance by **30%** migrating legacy services to **.NET 8**, modernising dependency injection and async patterns.
- Slashed deployment time by **50%** by overhauling **CI/CD pipelines** in Azure DevOps with staged gates, parallel jobs, and automated test integration, partnering with **DevOps** and QA teams.
- Improved API response time by **34%** via **Redis**/ElastiCache caching, connection pooling, and targeted query optimisation on hot-path endpoints.
- Eliminated message loss by designing **AWS SNS/Lambda/S3** pipelines with idempotent processing and retry/backoff handling for reliable async delivery at global scale.
- Accelerated build and test cycle speed by **33%** through parallelised testing and build caching, enabling the **Agile/Scrum** team to ship **10+ features per quarter**.
- Reduced mean time to diagnose incidents by instrumenting services with structured logging and **Splunk** dashboards, collaborating with **Product and Test** teams on root cause analysis.

Projects

Expense Tracker – Full-Stack Microservices Application Aug 2023 – Dec 2023
Java, Spring Boot, Kafka, Docker, Kubernetes, PostgreSQL

- Built a full-stack web application using **Java**/Spring Boot with **5+** microservices, async **Kafka** messaging, and SQL-based transaction management.
- Containerised all services with **Docker** and **Kubernetes**, reducing environment setup time by **60%**; integrated Kong API Gateway for routing and load balancing.

Stock Recommendation and Prediction Apr 2022 – Jun 2022
Python, MySQL, Streamlit, Yahoo Finance API

- Developed a web application using Python and LSTM models for 30-day stock predictions; deployed using Streamlit with Firebase and Yahoo Finance API integration.

Certifications

AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024

Education

B.Tech in Computer Engineering, Vishwakarma Institute of Technology, Pune (S.P.P.U) 2024 | 8.8 GPA
