Sanskar Jain

Backend Software Engineer | C# / .NET | AWS | JavaScript / React | Hyderabad, India
+91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Backend-leaning full stack engineer with **2+ years** building service-oriented, event-driven systems and REST APIs on **AWS** at Verisk Analytics, covering new services and legacy modernization. Built and run a multi-tenant **React/TypeScript** payroll SaaS from scratch for 15+ businesses; works across backend, frontend, and databases in cross-functional teams.

Technical Skills

Languages: C#, JavaScript, TypeScript, Java, Python, SQL
Backend & Architecture: .NET 8, ASP.NET Core, .NET Framework, Service-Oriented Architecture, Microservices, REST APIs, Async Programming, Multithreading, LINQ, Spring Boot, Swagger/OpenAPI
Frontend: React 18, HTML5, CSS3, Vite, TailwindCSS, TanStack React Query, Axios
Cloud & Messaging: AWS (EC2, Lambda, SQS, SNS, S3, EKS, ElastiCache), Kafka, Docker, Kubernetes, Kong Gateway, Azure DevOps
Databases: MongoDB, PostgreSQL, Redis, Elasticsearch, Indexing and Query Tuning
Security, Testing & AI Tooling: OAuth 2.0, JWT, Okta, xUnit, NUnit, Claude Code, GitHub Copilot, OpenAI API

Professional Experience

Verisk Analytics Hyderabad, India
Software Engineer II Apr 2026 – Present
Software Engineer I Jul 2024 – Mar 2026

- Co-designed and built **RulesRunner**, a stateless .NET microservice that moved compliance checks off the client onto an **AWS SQS**-backed worker, cutting user wait time from about **3 s to 0.5 s** and allowing horizontal scaling.
- Designed event-driven pipelines on **SQS**, **SNS**, and **Lambda** with idempotent consumers, retry/backoff, and dead-letter queues, handling about **500 production messages a day**; wrote the design docs for service boundaries and APIs.
- Built the backend for **Xactimate** import/export across **30+ data types** using asynchronous processing, **S3** presigned URLs, and **MongoDB**; transfers became ∼38% faster and related customer tickets fell by roughly a quarter.
- Added URL-based versioning across **16 v2 endpoints** and **Swagger/OpenAPI** docs to **ASP.NET Core** REST APIs handling ∼200K requests a week.
- Cut hot-endpoint response times by ∼34% through **ElastiCache** caching, connection pooling, and index tuning on **MongoDB** and **PostgreSQL**, and used **Elasticsearch** to bring down search latency.
- Rolled out **OAuth 2.0** with Okta-issued **JWTs** on **AWS EKS** behind **Kong** API Gateway for 6 of the platform's 15+ services, integrating with the existing Identity Server flow.
- Migrated 4 client applications from Forms Authentication to **JWT** bearer auth over a shared **Redis** session store, with token revocation so logout ends the session everywhere.
- Moved legacy **.NET Framework** services (ASP.NET MVC, Web API 2) to **.NET 8** and reworked **Azure DevOps** pipelines with staged gates and parallel jobs, roughly halving deployment time; services run on **AWS EC2** and EKS in eu-west-1 and us-west-2 with biweekly releases.
- Built an internal agent in **Python** on the **OpenAI API** that drafts and routes 30–50 Jira tickets a week; use **Claude Code** and **GitHub Copilot** daily, reviewing all generated code before merge; mentored 4 junior engineers.

Software Engineering Intern Jan 2024 – Jun 2024

Projects

Attendance & Payroll SaaS (sole developer) | sanskar-engineers-payroll-ui.onrender.com Jul 2026 – Present

- Built from scratch a multi-tenant payroll and attendance product used by 15+ small businesses on **Spring Boot** (**Java 17**), **React** + **TypeScript**, and **PostgreSQL**, deployed on Render; tenant isolation via shared-schema `org_id` and Hibernate filters, with **JWT** auth and 3-role RBAC.
- Wrote a payroll engine for monthly, daily, and hourly pay with prorated mid-month rate changes, overtime, and advances; finalized records are locked against retroactive edits.

Expense Tracker Aug – Dec 2023

Five **Spring Boot** microservices with **Kafka** and **Kong** API Gateway, a **React** frontend in **JavaScript**, **HTML**, and **CSS**, containerized with **Docker** and run on **Kubernetes**.

Education & Certifications

B.Tech in Computer Engineering, Vishwakarma Institute of Technology, Pune 2020 – 2024 | CGPA: 8.8/10
AWS Certified Cloud Practitioner, Amazon Web Services Oct 2024
